

ENOVIA Live Collaboration for Work Groups

Product Objective

ENOVIA® Live Collaboration for Workgroups establishes the necessary environment for ENOVIA applications deployed in a workgroup setting with minimal administrative effort and accelerated deployment.

Product Overview

Although the ENOVIA system architecture is based on standard 3rd party supported platforms for databases and application servers, smaller workgroup deployments may not have the capacity and staff to fully administer the ENOVIA environment. ENOVIA Live Collaboration for Workgroups establishes the necessary environment for ENOVIA applications deployed in a workgroup setting. It includes automatic installation and configuration of database and web application server software, and ENOVIA® Live Collaboration, which is licensed separately. As a result, customers quickly benefit from their ENOVIA solution with minimal administrative effort and accelerate the time to deploy the ENOVIA system.

The following platform components are delivered and installed automatically:

- Delivery and configuration for MySQL database
- Delivery and configuration for Tomcat J2EE Application server
- Delivery and configuration for Sun JDK
- Delivery and configuration for ENOVIA Live Collaboration

Product Highlights

ENOVIA Live Collaboration for Workgroups establishes the necessary environment for ENOVIA applications deployed in a workgroup setting with minimal administrative effort and accelerated deployment. Key features and capabilities include:

Simplified Installation

ENOVIA Live Collaboration for Workgroups simplifies the installation and setup of the ENOVIA system using an automated installation process that deploys the necessary 3rd party product requirements automatically. These include the installation and configuration of the underlying database and application server.

Minimal Administrative Support

ENOVIA Live Collaboration for Workgroups does not require significant knowledge for database administration or J2EE application deployments. The tasks for installing the MySQL database, Tomcat Application Server and SUN JDK are delivered and configured automatically. This software is included with the ENOVIA Collaboration Platform's distribution. An administrator merely has to load the product CDs (or electronic distribution) and follow the instructions. No additional administrative preparation or tasks are necessary.

Key Customer Benefits

- Leverage the features of the ENOVIA Collaboration Platform in a single installation that provides the necessary architecture prerequisites (Database and Application Server)
- Reduce the cost associated with 3rd party platform dependencies to deploy the ENOVIA Collaboration Platform in a workgroup setting
- Minimize dependencies on corporate IT staff by leveraging automatic installation and configuration of the ENOVIA Collaboration Platform environment

Note that not all ENOVIA products are qualified to run with ENOVIA Live Collaboration for Workgroups. This product can only be used with other ENOVIA products if they indicate support for Apache Tomcat, Red Hat Linux and MySQL in the official ENOVIA support matrix.

The Role of ENOVIA V6 and PLM 2.0

ENOVIA Live Collaboration for Work Groups supports PLM 2.0, product lifecycle management online for everyone, and the ENOVIA V6 values: global collaboration innovation, single PLM platform for intellectual property (IP) management, online creation and collaboration, ready to use PLM business processes, and lower cost of ownership.

About ENOVIA

ENOVIA is the recognized leader in delivering collaborative PLM solutions. We enable companies from a broad range of industries to dramatically accelerate innovation, time-to-market and revenue generation by collaboratively developing, building and managing products. Our solutions facilitate the sharing of concepts, content and context across product lifecycles and throughout value chains of employees, customers, suppliers and partners.

ENOVIA collaborative PLM solutions help global enterprises bring together people, processes, content and systems to achieve a compelling competitive advantage. Our interoperable solutions unify and streamline processes across the product lifecycle, enabling companies to easily and cost-effectively work on projects within and outside of their enterprises. Our adaptable, scalable technology is built to accommodate the ever-changing marketplace.

About Dassault Systèmes

As world leader in 3D and Product Lifecycle Management (PLM) solutions, the Dassault Systèmes group brings value to more than 90,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that support industrial processes and provide a 3D vision of the entire life cycle of products from conception to maintenance. Our offering includes integrated PLM solutions for product development (CATIA®, DELMIA®, ENOVIA®, SMARTEAM®), mainstream product 3D design tools (SolidWorks®), 3D components (Spatial/ACIS®) and SIMULIA®, DS' open scientific platform for realistic simulation. Dassault Systèmes is listed on the Euronext Paris (#13065, DSY.PA) stock exchange. For more information, visit 3ds.com.
